

Stick With Tradition

Purchase and use traditional liquid or powder laundry detergent rather than packets if children younger than six years live in or visit your home.

Keep In Original Packaging

If you use laundry detergent packets, keep them stored in their original container until you put them in the washing machine.

Store Safely

Store laundry detergent packets up, away, and out of sight – in a locked cabinet is best.

Straight Into The Machine

When you take out a laundry detergent packet to use, put it directly into the washing machine. Immediately return the closed container to its safe storage spot.
