DROOLING

DIZZINESS

NAUSEA

RESPIRATORY DEPRESSION

HEADACHES

VOMITING

SHORTNESS OF BREATH

LOW BLOOD PRESSURE

SEIZURES

PREVENTION

Open counters, shelves, unlocked drawers, purses and bags aren't safe storage places for e-liquid.

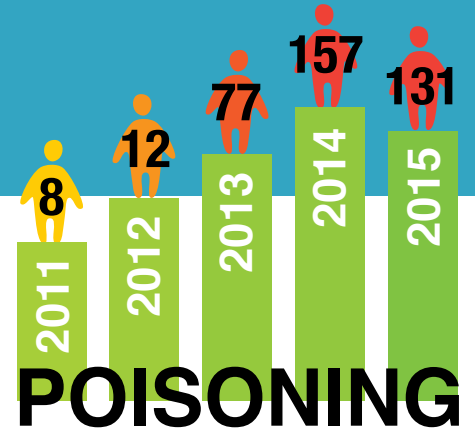

Place poisons out of sight and reach. Use child safety locks on cabinets in all areas of your home.

Child-resistant does not mean completely child proof, and may only slow children down.

Rinse empty containers before disposal, they may still contain small amounts of liquids.

POISONING

Liquid nicotine is manufactured for use in electronic cigarettes (e-cigarettes), sold in a highly concentrated form, and **can be fatal if swallowed or absorbed in the skin.** In 2015, there were 131 nicotine-related poisonings were reported to the Oklahoma Center for Poison and Drug Information.

For more information about the dangers of liquid nicotine use, visit the Oklahoma Center for Poison and Drug Information website at Oklahomapoison.org or call the OSDH Center for the Advancement of Wellness at **405-271-3619**.
